

To further reduce the spread of COVID-19 among our staff, patients, and community, Huntington Hospital has now instituted a more comprehensive surgical mask policy.

Please note that masks are required to be worn in clinical areas and you must continue to follow proper PPE protocol for isolation patients. We are recommending you wear a surgical mask while in common areas when social distancing is not possible.

### **Upon Arrival:**

- Upon arrival to our campus, all staff, patients and visitors, will complete screening procedure and then obtain a surgical mask.
- Surgical masks are recommended to be worn in common areas. Masks are **REQUIRED** in clinical areas.
- Masks must be kept in a paper bag or ziplock when not worn
- When providing care to an isolation patient, follow proper PPE protocol.

### **Upon Departure:**

- Masks should be thrown away upon leaving for the day.

*Please remain vigilant in our efforts to conserve all our PPE. The best ways to do this are to:*

1. Follow proper PPE protocol
2. Take good care of our PPE when in use to avoid damage or loss.
